Thanks, Mark! Looks like your email crossed paths with the voice-mail message I just left you. So please ignore and delete it as you deem fit.

Hi Mark,

I'm not sure if you're the right person to seek answers from, but if you're not, please let me know who that might be. Anyway, Cheryl Seager and Larry Starfield are asking about Eagle Industries in Oklahoma. I don't know if you're familiar with this facility and its two properties, but I'll forward some material to you shortly. Namely, Cheryl and Larry want to confirm that there are no more RCRA enforcement efforts for Eagle Industries. Based on the material I'll be forwarding shortly, I believe the answer is that yes, there are no more RCRA enforcement efforts expected for Eagle Industries. Could you please confirm that is, in fact, the case? Or if you know someone else whom I should ask, could you please let me know?

Thanks,

Ed Q.

Can y'all please confirm there is no enforcement for both sites.
I believe same owner – main site may be in Superfund and second storage location may have a spill?
If someone can sort out and say with clarity what there is and that no enforcement appropriate at this time.
Thanks

Thanks. And there was some mention that there might be two 'Eagle' sites. I believe Sam was especially asking about whether there were Enf options for a site in Okl, tho Patricia could confirm.

Jim,

I am certain that Superfund conducted a response at Eagle but I don't remember the specifics. I will look when I get in on Monday and see what I can find.

Attached are the documents I received from ODEQ yesterday. There is an information document with the inspection history and a timeline of the RCRA enforcement actions. The ODEQ RCRA enforcement case file was closed in 2010 based on the company's financial status and the state's intent to involve Superfund to evaluate the site. There was no further RCRA enforcement action until 2015, when the state requested immediate action to address contamination. Superfund may have additional information on activity after 2010.
